

KomeKare Presentation

Palliative Care

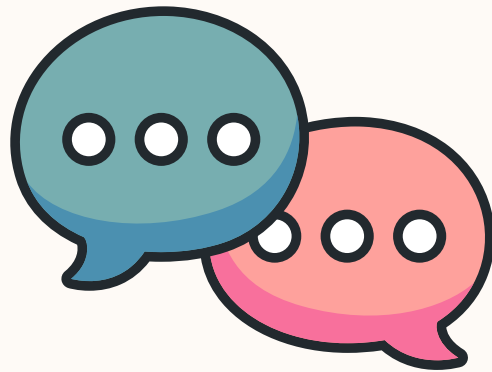

OUR MISSION

CONNECTION

Our goal is to connect caregivers and hospitals so that they reduce communication gaps.

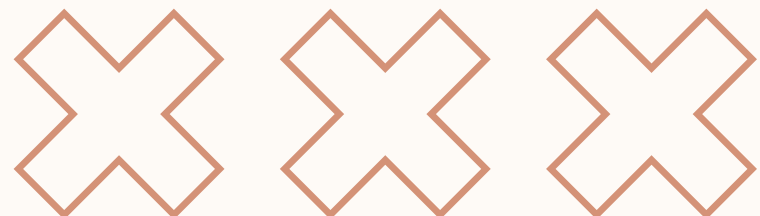

AI INSIGHT

Our goal is to leverage AI to make an analysis of our patients and provide proper care

OUR VISION

The vision of KomeKare is to reduce stress of caregivers and give them specific tasks

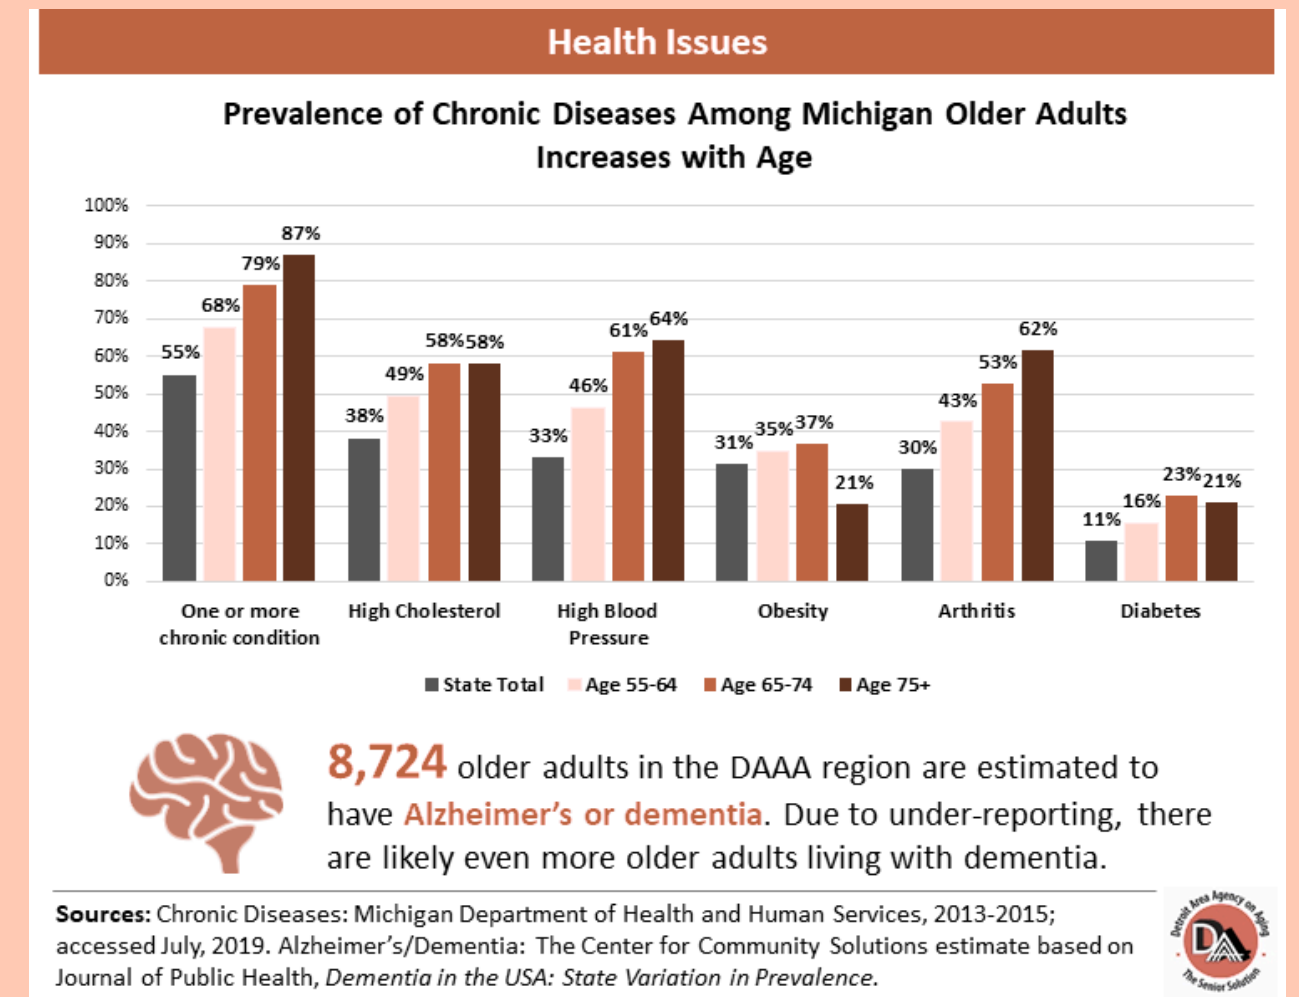

The Opportunity

Market Statistics :

1. **¼** American Adults are characterized as caregivers (NIH)
2. **78%** experience burnout (A Place for Mom)
3. **73%** of patients experience medication errors annually (NIH)
4. On the provider side, **39%** find caregiver interactions “time-consuming” (AARP)
5. The disease frequency and age-related issues market is expected to **grow by 17.3%** (CAGR)
6. ~\$2.6B market in 2024 → **~\$4.5B in 2025**

Sources: NIH, SCP Health, “A Place for Mom”, and AARP

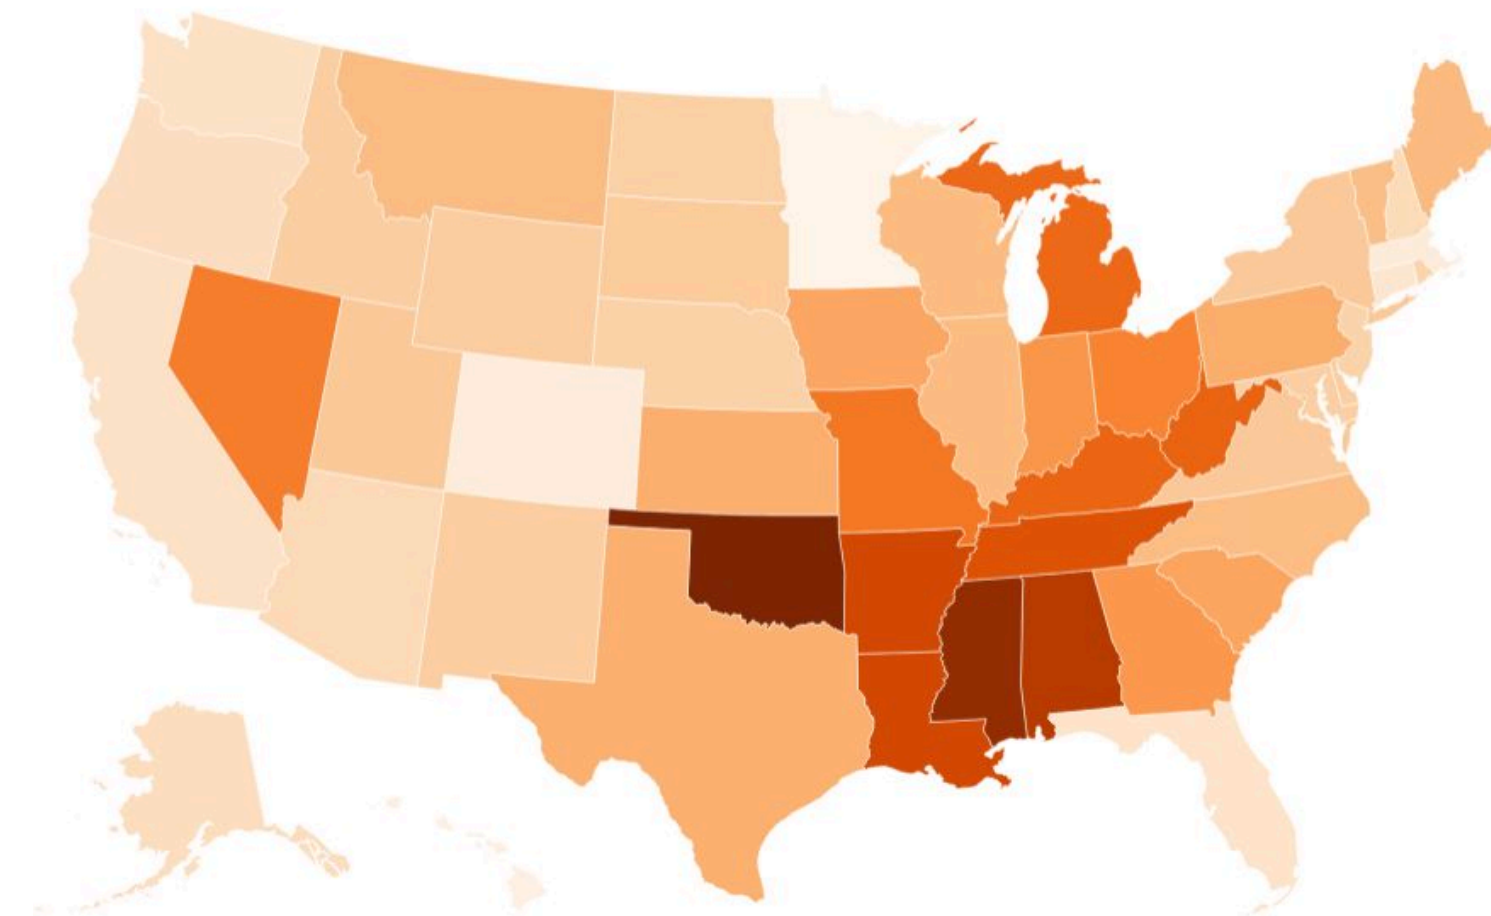

The most affected age group is ages 65+, which provides the age group that needs the most help

The Problem

What are we solving?

- Caregivers and patients both need uniform information
- Patients in remote areas need quick diagnostics
- Hospital records need quick transfer and see new symptoms

Heart Disease Death Rates in U.S. States In 2022
(Per 100,000 Population)

OCTOBER 2023

Shared Calendar

MON	TUE	WED	THU	FRI	SAT	SUN
23	24	25	26	27	28	29

Today's Schedule

4 PENDING

Medication: Daily Meds

8:00 AM

Check dosage for morning routine.
Ensure water is available.

MEDS

DAILY

Doctor Appointment: Therapy Session at St. Jude

2:00 PM

Physical therapy focus on mobility.
Room 402, North Wing.

Tasks

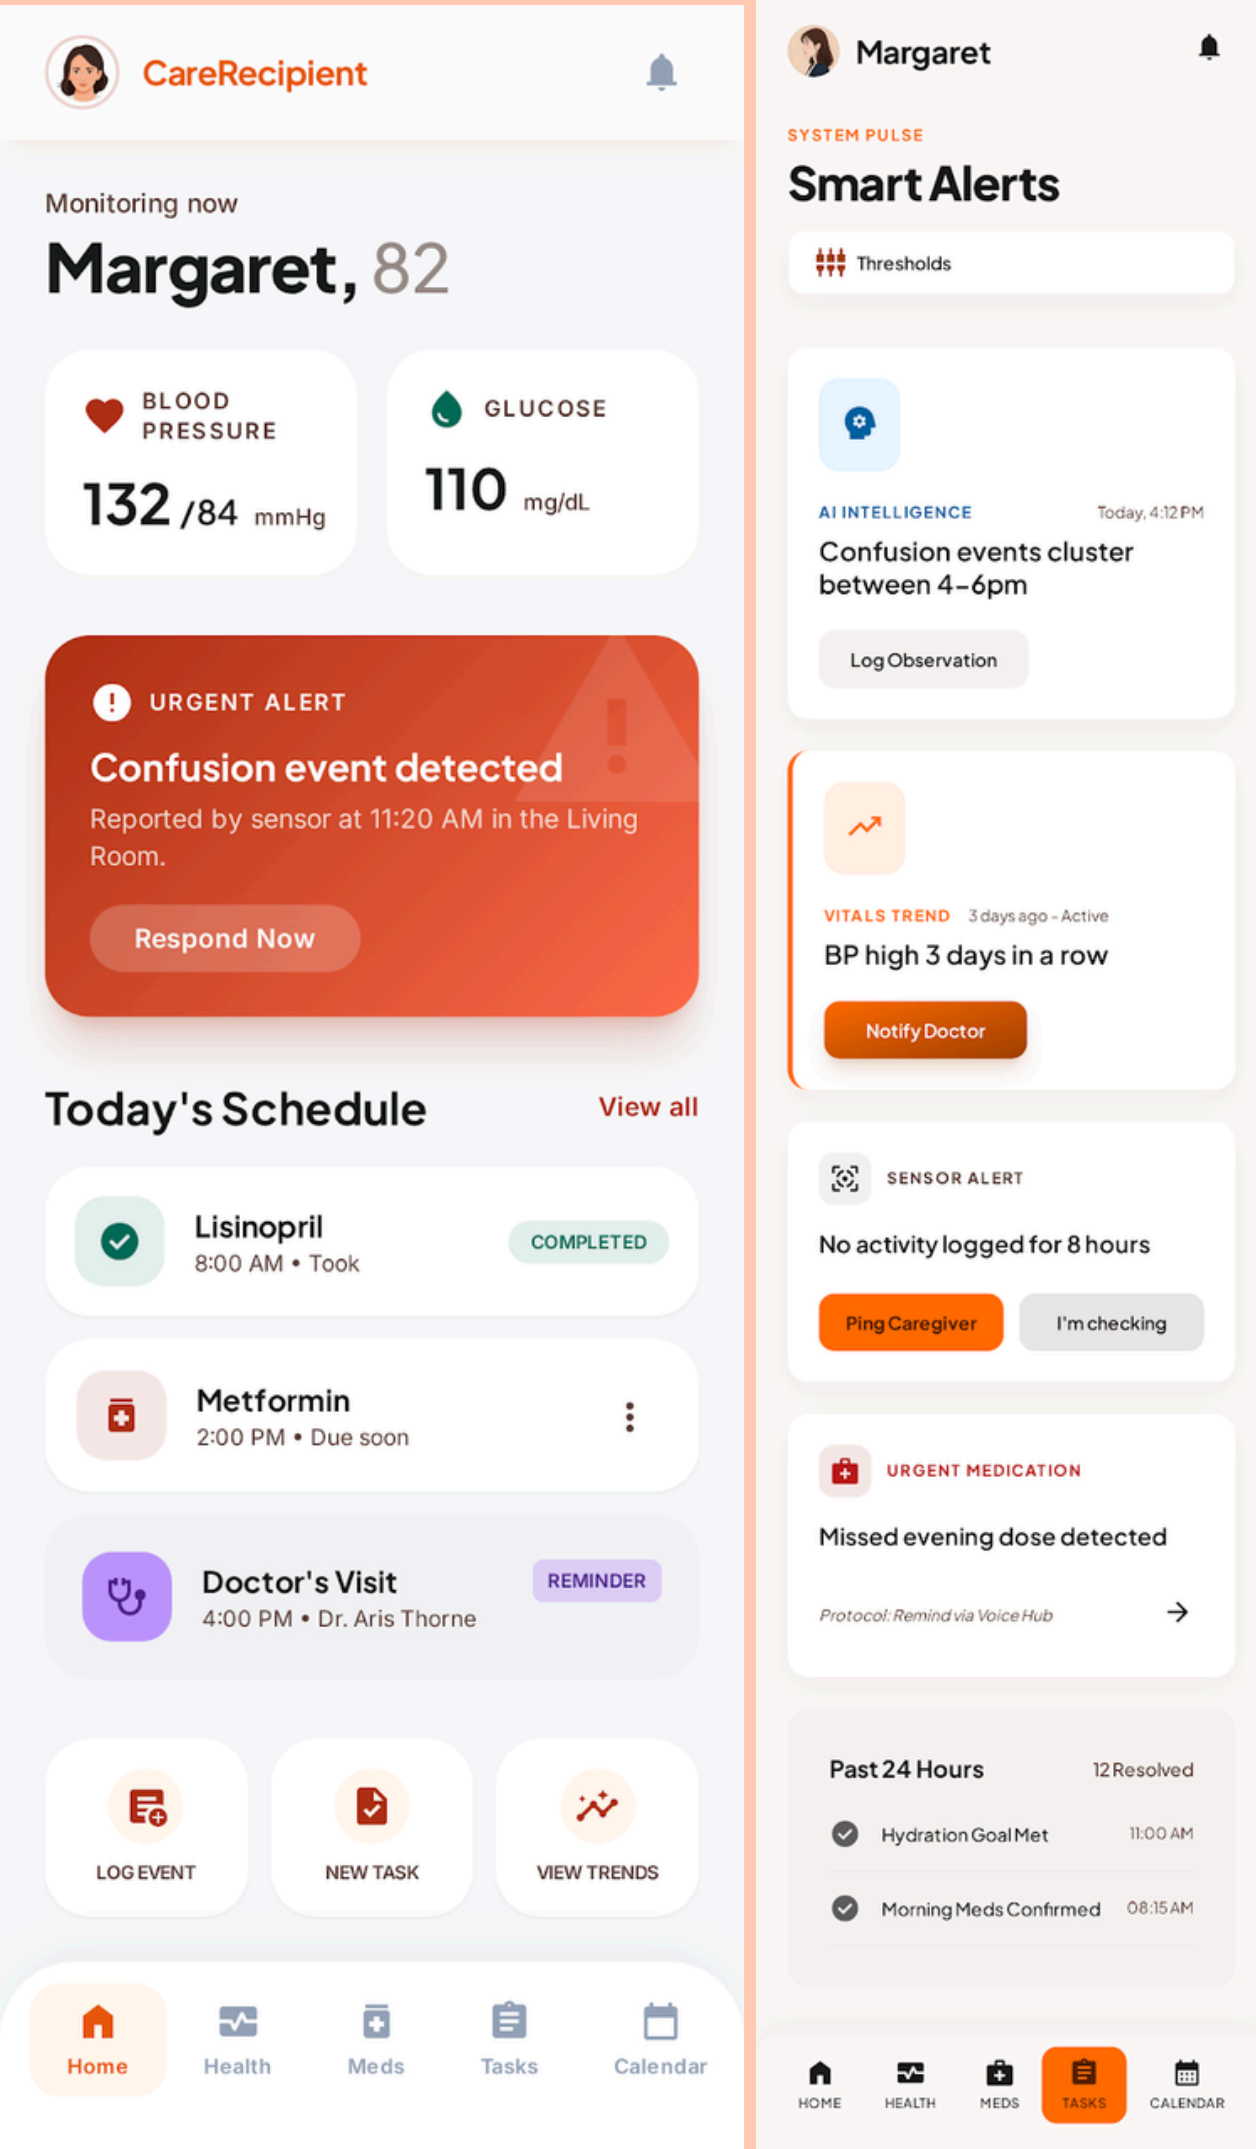

Calendar

Adaptive Solutions for Local Needs

Each region has unique challenges.
We customize logistics to fit :

- 1 Finding nearby caregivers for lonely patients
- 2 Tasks for the caregiver
- 3 Medications and specifications for caregivers
- 4 Add new tasks to be updated and keeps providers and patients informed

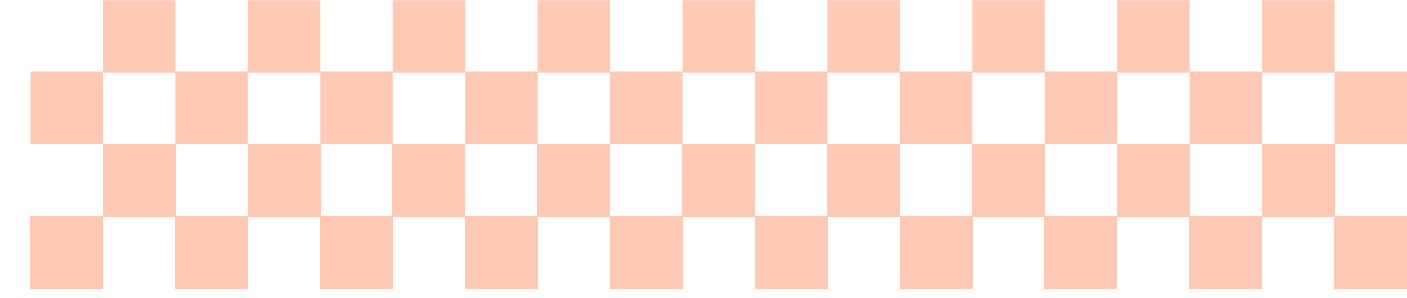

Product Demonstration

Our approach includes :

- Real-time tracking for urgent vitals and pills.
- A schedule and tasks for the patient and caregiver to be informed
- Provide health statistics with AI insight

Resource Page

- Utilized VS Code, ChatGPT, Claude, and Perplexity
- Used for planning, research, and debugging
- Used NIH, online surveys, and Alzheimer's Society for statistics
